# PRINCIPLES OF ANALYTICAL DESIGN

**Reasoning** and **communicating** our thoughts are intertwined with our lives in a causal and dynamic multivariate Universe.

**Symmetry** to visual displays of evidence: consumers should be seeking exactly what producers should be providing, namely:

- meaningful comparisons
- potential causal networks and underlying structure
- multivariate links
- integrated and relevant data
- honest documentation
- primary focus on content

**Non-Integrated Data**

# REPRESENTING MULTIVARIATE DATA

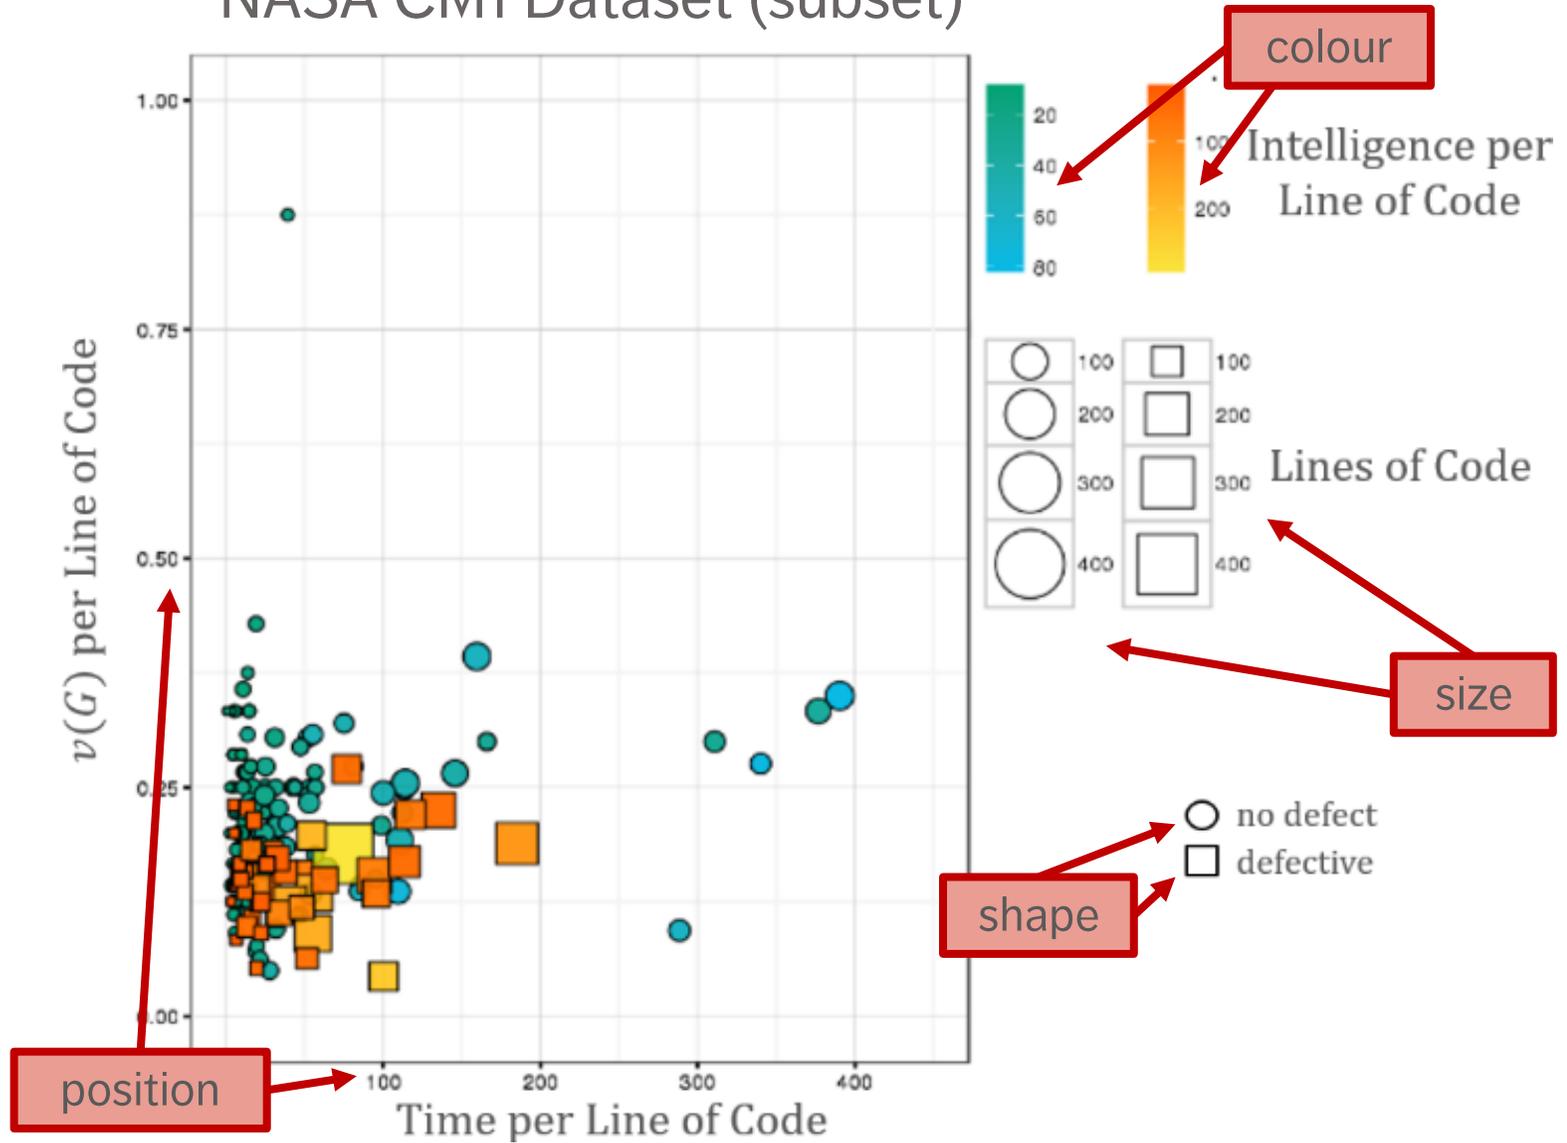

2 variables can be represented by **position** in the plane.  
**Additional factors** can be depicted with:

- size
- color
- value
- texture
- line orientation
- shape
- (motion?)
